

SUMMARY

This stock market analysis dashboard tracks the performance of companies like Apple, Tesla, Google, and others from 2016 to 2020. Key metrics include price changes, trading volume, and moving averages. The dashboard also identifies the highest price (\$1,530.74), lowest price (\$13.73), and total volume (106 billion shares) during the period.

CONCLUSION

The analysis provides a detailed view of stock performance and trading behaviour over time. It highlights trends in volume and price, enabling investors to identify patterns and make data-driven decisions. Tesla's high volatility and significant price movements stand out, suggesting potential investment risks or opportunities.
